

GROWTH AND RETENTION REVIEW

theLook grows over 40% a year and still leaks revenue in three places

Abandoned carts, lost orders and one-time buyers

Revenue has grown more than 40% every year

January to September 2026 has already passed all of 2025 by 35%.

Kept revenue by year, excluding cancelled and returned orders. Source: thelook_ecommerce snapshot, 4 Oct 2026.

58% of carts never become a purchase

250,603

sessions added to cart and left without buying. Only 41.9% of carts convert, which makes checkout the largest single leak.

Website sessions by furthest stage reached. Each session maps to one item in this dataset.

One in four orders is lost, and most buyers never return

24.8%

**of orders are cancelled
or returned**

30,967 of 124,966 orders. 14.9%
cancelled, 9.9% returned.

69.3%

of buyers order only once

45,958 of 66,349 buyers never placed
a second order.

1.6%

**of buyers return in any
later month**

The rate stays flat from month 1
through month 12.

Channels do not explain it. All five deliver the same repeat rate, between 30% and 31%.

Retention uses first-purchase cohorts with at least 12 months of history. Source: thelook_ecommerce snapshot, 4 Oct 2026.

Three actions, in order of impact

- | | | |
|---|--|---|
| 1 | Fix checkout first
Cart reminders and a shorter checkout | 41.9% → 45% cart-to-purchase
About 600K in kept revenue |
| 2 | Cut cancellations and returns
Find the top causes by category and reason | 24.8% → 22% of orders
About 108K per point recovered |
| 3 | Win the second order
A second-purchase offer within 30 days of delivery | 30.7% → 35% repeat rate
About 2,850 more repeat buyers |

Sizing assumes today's averages hold. The dataset is synthetic and holds no marketing spend, so budget by channel needs cost data.
